

6 Benefits

SOFTWARE | **HOSTING** | IMPLEMENTATION | TRAINING | SOLUTIONS

LOWER COST OF OWNERSHIP

MLM's "Tiered Pricing" offers customers an easy method to manage cost for their dedicated hosting environments. Tiered pricing allows for growth within your organization without affecting your cost for hosting.

IMPROVED QUALITY OF PERFORMANCE & SERVICE

MLM's team of highly trained and certified Oracle Primavera and Microsoft technicians monitor, support, and maintain all systems 24x7x365 using advanced monitoring and notification systems. MLM's technical team also monitors and responds to all customer service requests 24x7x365, normally resolving issues within 15 minutes.

SIMPLIFIED AND FAST DEPLOYMENTS

P6 EPPM and Contract Management can be complicated to deploy. With MLM, you provide the software and we take care of the rest. While most full-scale deployments take two weeks we have deployed "kickoff" systems within a day or two.

DEDICATED, SECURE ENVIRONMENTS

Customers have their own, dedicated environment. MLM does not support multi-tenant deployments. This practice provides improved security and scalability. Our global datacenters meet requirements for ISO 9000, Sarbanes Oxley, & SAS70 Type II.

CREATIVE SOLUTIONS

Available exclusively to our hosted clients, MLM provides custom Web-based utilities that are designed to save time and money by eliminating redundant data entry and providing customized user access screens.

EXPERIENCE

Our team of Estimators, Schedulers, Cost Engineers, Project Administrators, Project Managers and Oracle Certified Trainers bring decades of field experience. MLM's data centers have supported hundreds of implementations utilizing Primavera and other project management related systems to support these innovative technologies.

Global data centers provide hosting solutions for international clients.
