MLM helps clients plan for unforeseen costs.

LOWER TOTAL COST OF OWNERSHIP

MLM Project Services, Inc., (MLM) provides Oracle Primavera hosting and managed services that enable organizations to save time and money by managing their entire Oracle Primavera technical requirements. This allows an organization to focus on their core business strengths and activities, rather than on the daily operations, support, and maintenance of their Oracle Primavera applications and systems.

Our team provides secure, dedicated environments that easily communicate to your internal systems. MLM provides customized web services utilities that are designed to save your team time and money through role based user interfaces.

Tiered Pricing offers customers an easy method to manage cost for their dedicated hosting environments and allows growth within your organization without affecting your costs for hosting.

Providing the path to a complete solution, contact us for more information.
